

## Specifications

# SMART Board® interactive whiteboard system

Model SB885i6

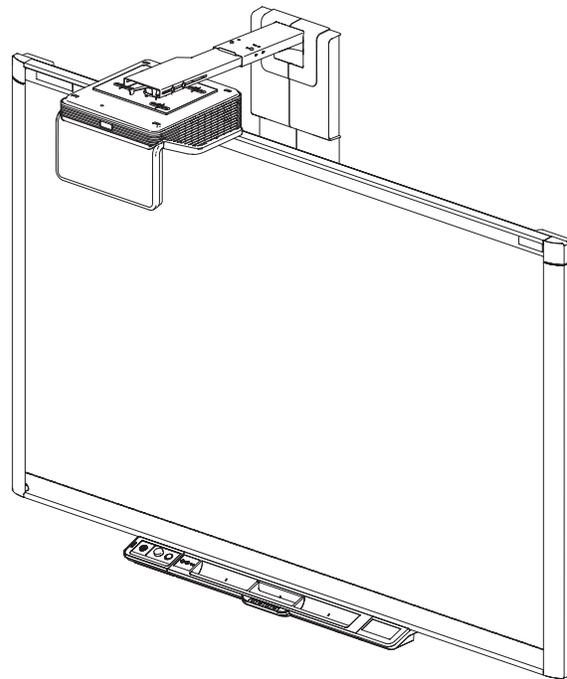

## Overview

Your SMART Board® 885i6 interactive whiteboard system combines the use of a SMART Board 800 series interactive whiteboard and a SMART UF70w projector along with other accessories and optional equipment.

The SMART UF70w projector provides an ultra-bright high resolution image on a short boom delivering high definition, high performance interactivity that is virtually shadow-free and glare-free. You can do everything you can do at your computer—open and close applications, meet with others, create new documents or edit existing ones, visit websites, play and manipulate video clips and more— just by touching the interactive surface. Four users can draw on the interactive surface at the same time, and you can use an array of gestures within applications.

The SB885i6 system supports video and audio from a variety of devices including DVD and Blu-ray™ players, document cameras, and other high-definition sources, and is displayed on the interactive screen. All HDMI 1.4 inputs are HDCP compliant
